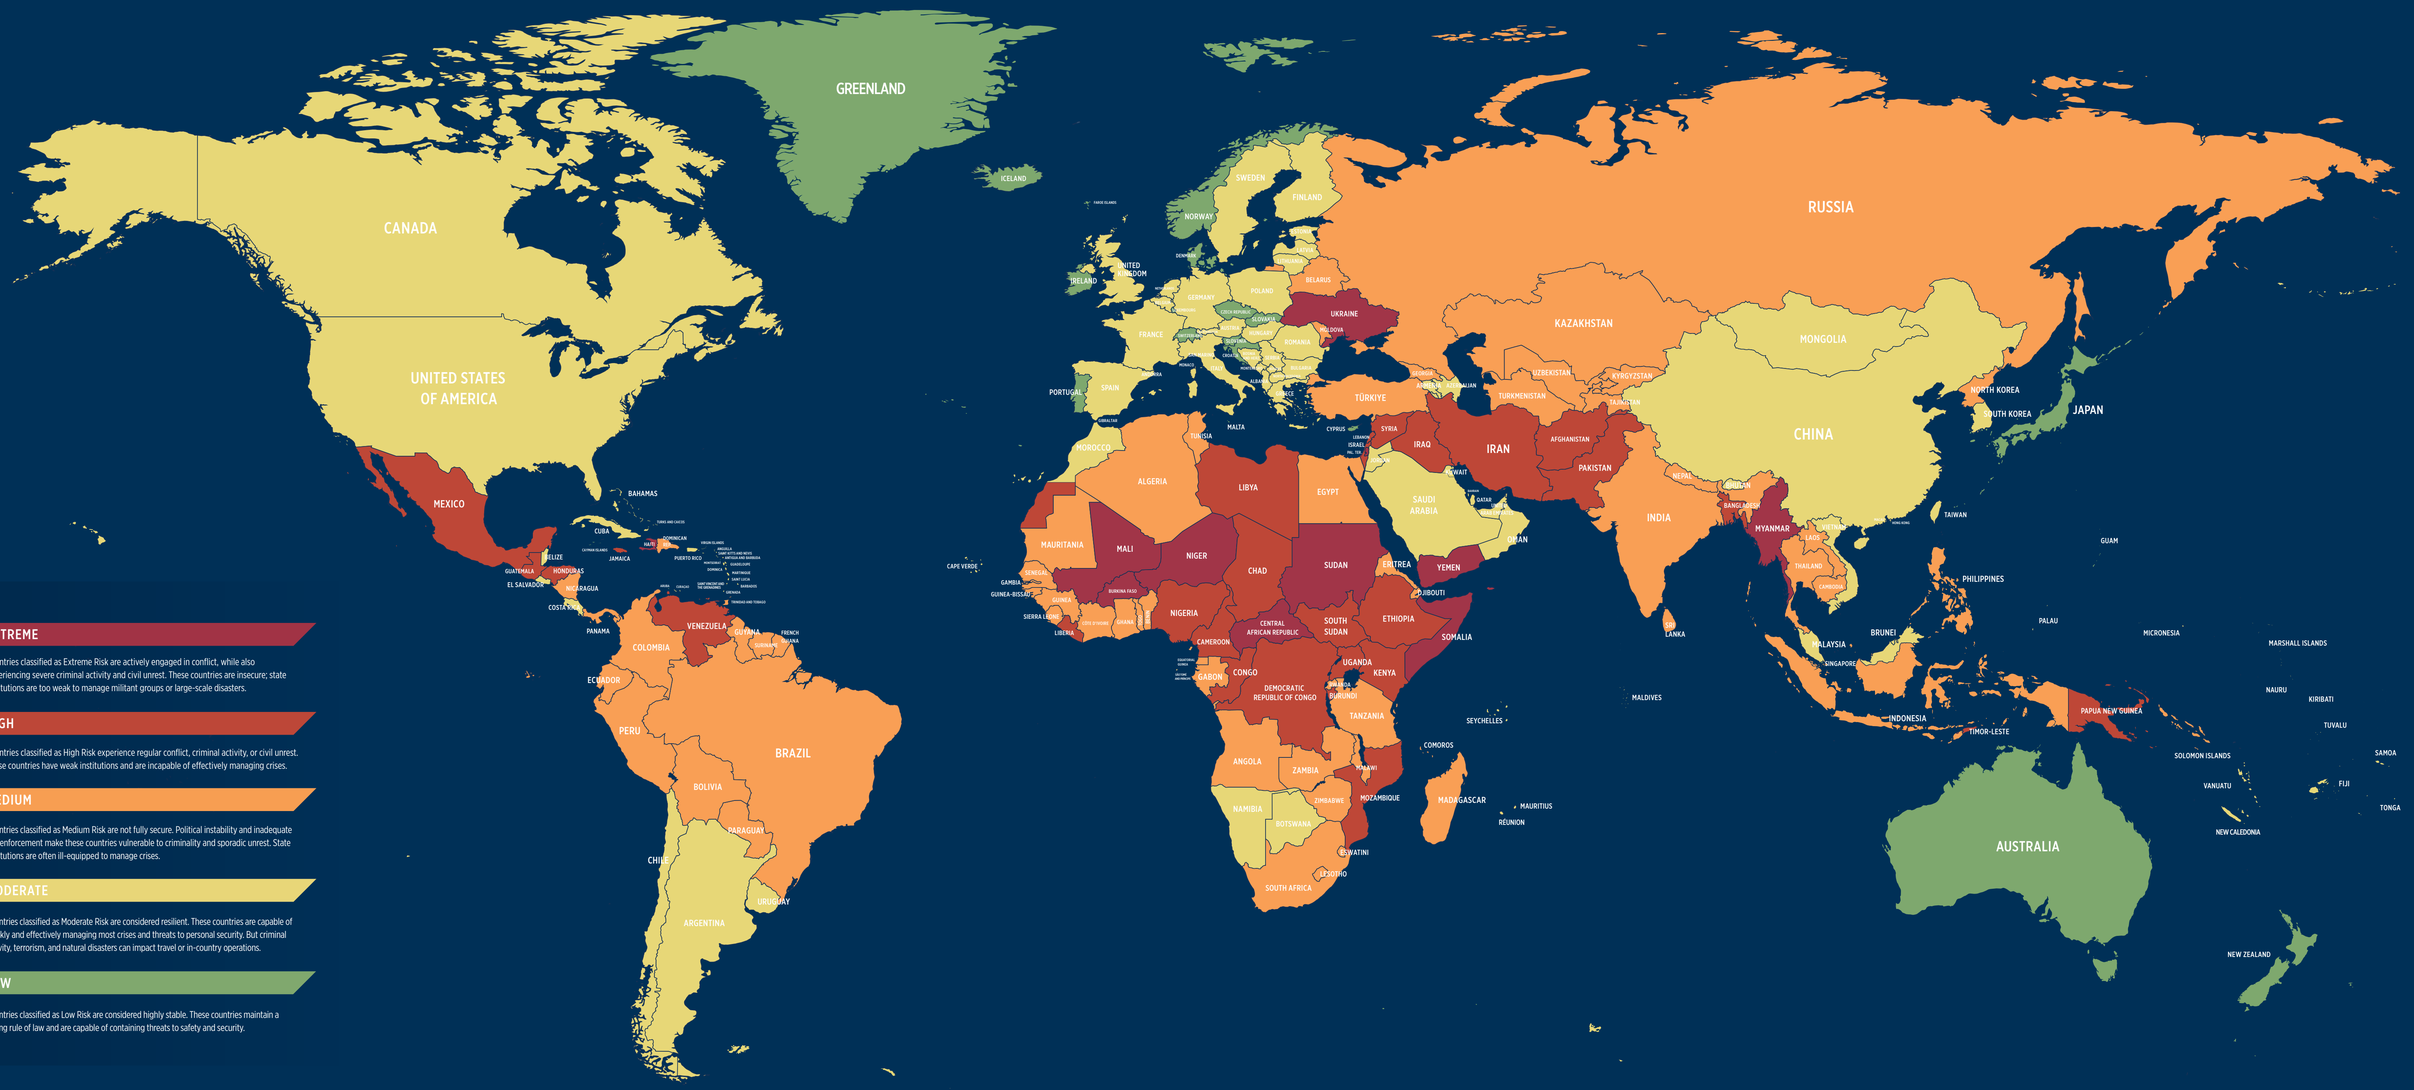
GLOBAL GUARDIAN

2026 Global Risk Map

The Global Risk Map highlights country-specific security risk ratings based on a series of indicators including crime, health, natural disasters, infrastructure, political stability, civil unrest, and terrorism. The map aims to inform businesses and their travelers on the risks they face abroad.



EXTREME

Countries classified as Extreme Risk are actively engaged in conflict, while also experiencing severe criminal activity and civil unrest. These countries are insecure; state institutions are too weak to manage militant groups or large-scale disasters.

HIGH

Countries classified as High Risk experience regular conflict, criminal activity, or civil unrest. These countries have weak institutions and are incapable of effectively managing crises.

MEDIUM

Countries classified as Medium Risk are not fully secure. Political instability and inadequate law enforcement make these countries vulnerable to criminality and sporadic unrest. State institutions are often ill-equipped to manage crises.

MODERATE

Countries classified as Moderate Risk are considered resilient. These countries are capable of quickly and effectively managing most crises and threats to personal security. But criminal activity, terrorism, and natural disasters can impact travel or in-country operations.

LOW

Countries classified as Low Risk are considered highly stable. These countries maintain a strong rule of law and are capable of containing threats to safety and security.

24/7 RESPONSE CAPABILITIES

- Burkina Faso
- Central African Republic
- Mali
- Myanmar
- Niger
- Somalia
- Ukraine
- West Bank & Gaza
- Yemen
- Afghanistan
- Bangladesh
- Cameroon
- Democratic Republic of Congo
- Ethiopia
- Guatemala
- Honduras
- Iraq
- Israel
- Jamaica
- Kenya
- Lebanon
- Libya
- Mexico
- Mozambique
- Nigeria
- Pakistan
- Papua New Guinea
- South Sudan
- Uganda
- Venezuela
- Algeria
- Angola
- Benin
- Bolivia
- Brazil
- Cambodia
- Colombia
- Côte d'Ivoire
- Djibouti
- Dominican Republic

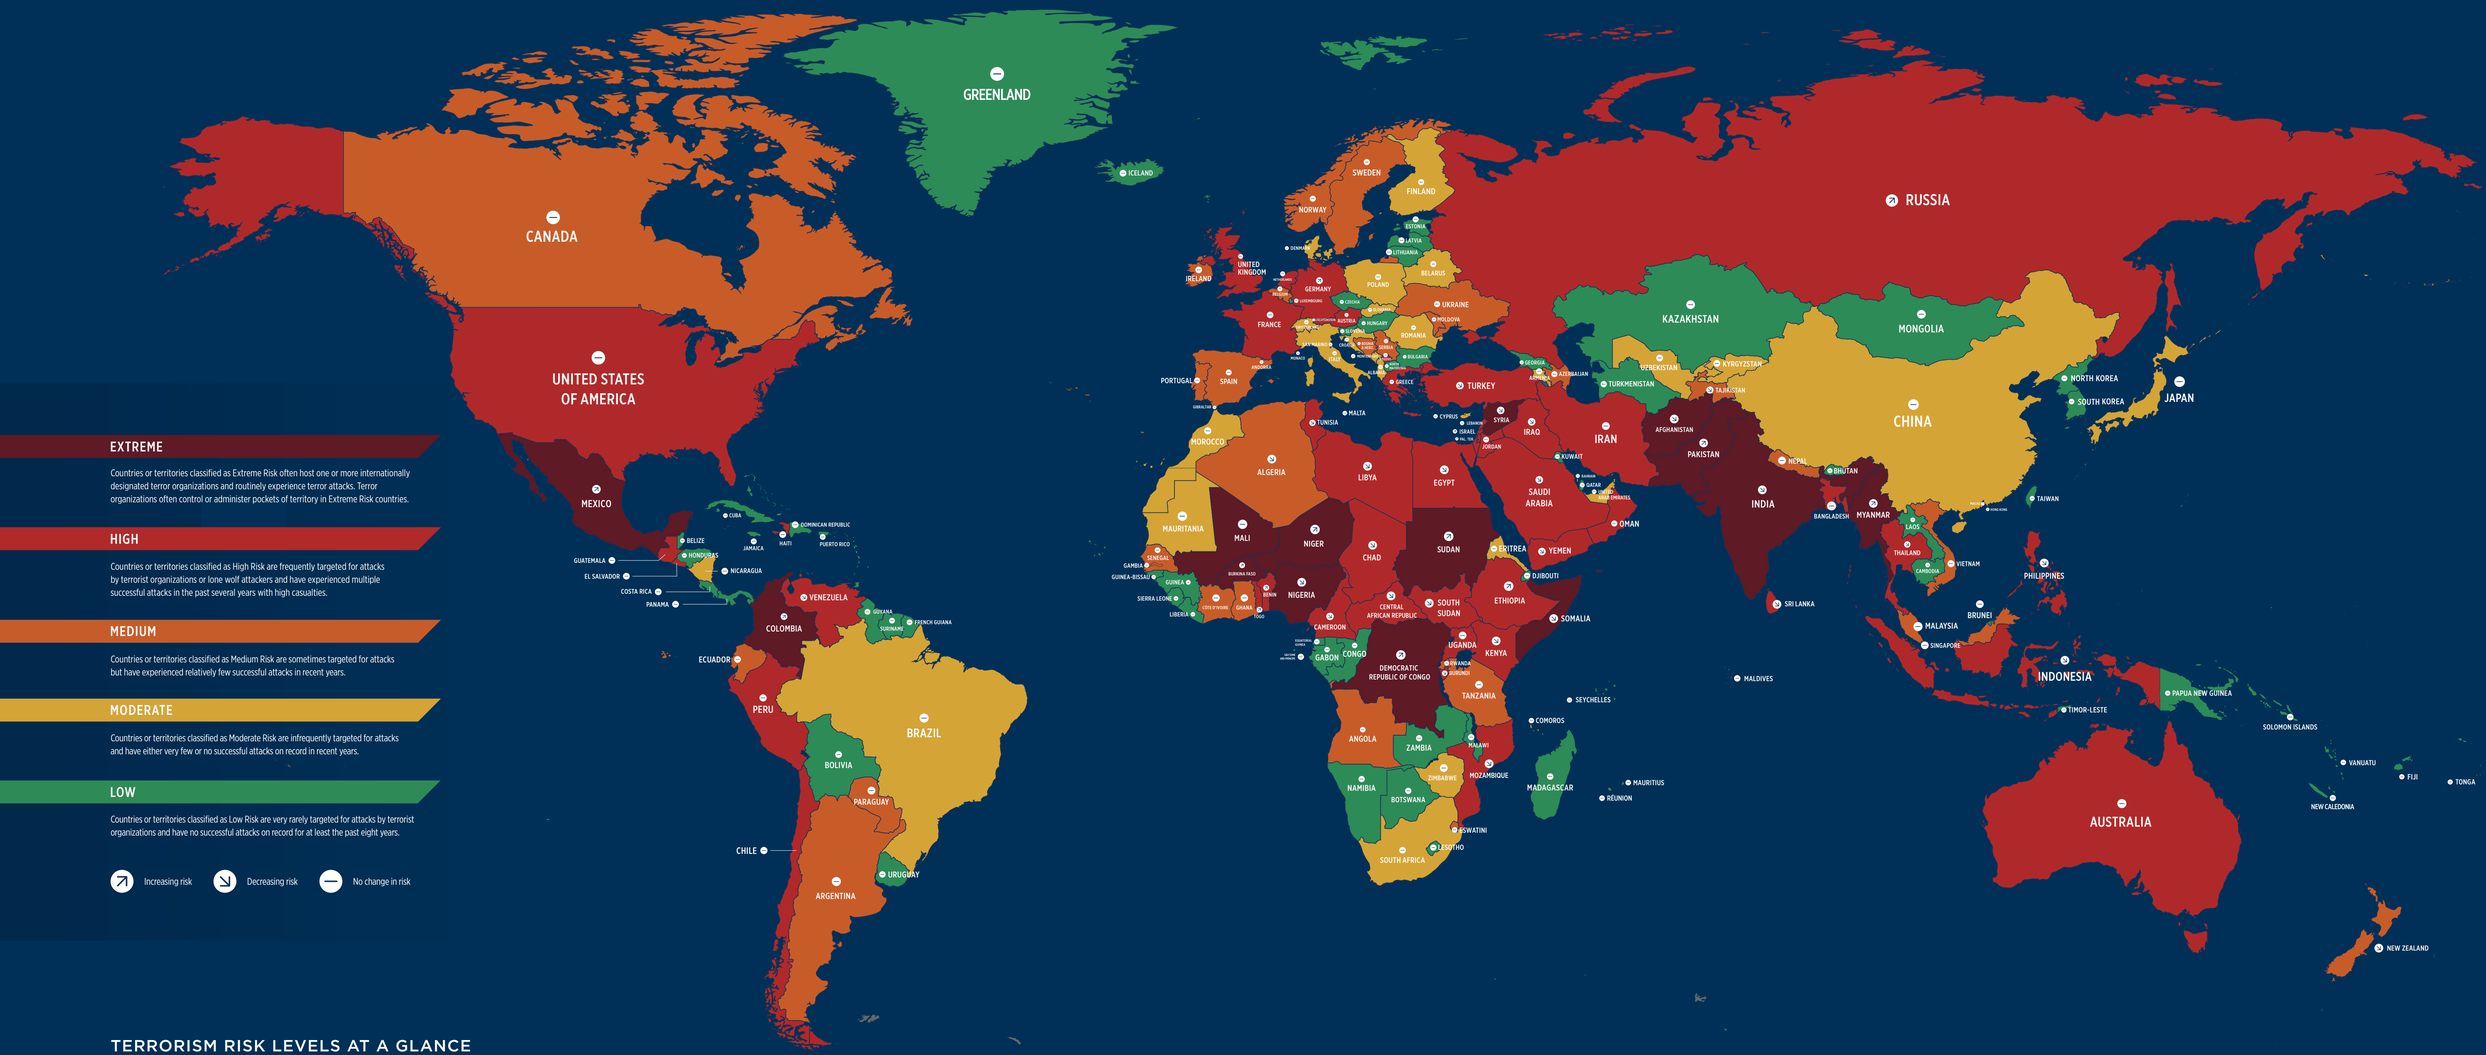
GLOBAL GUARDIAN

Global Guardian Terror Index

The Global Guardian Terror Index (GGTI) is a call to action that provides a snapshot of the current terror threat landscape. The GGTI attributes a categorical terror risk rating from Low to Extreme. The GGTI measures a location's current propensity for terrorism and its trajectory to give decision makers a better understanding of the 2026 security landscape in areas of operation and locations of travel.



EXTREME

Countries or territories classified as Extreme Risk often host one or more internationally designated terror organizations and routinely experience terror attacks. Terror organizations often control or administer pockets of territory in Extreme Risk countries.

HIGH

Countries or territories classified as High Risk are frequently targeted for attacks by terrorist organizations or lone wolf attackers and have experienced multiple successful attacks in the past several years with high casualties.

MEDIUM

Countries or territories classified as Medium Risk are sometimes targeted for attacks but have experienced relatively few successful attacks in recent years.

MODERATE

Countries or territories classified as Moderate Risk are infrequently targeted for attacks and have either very few or no successful attacks on record in recent years.

LOW

Countries or territories classified as Low Risk are very rarely targeted for attacks by terrorist organizations and have no successful attacks on record for at least the past eight years.

Increasing risk | Decreasing risk | No change in risk

TERRORISM RISK LEVELS AT A GLANCE

QATAR

TERROR INDEX: LOW | MODERATE | MEDIUM | HIGH | EXTREME

COMBATIVITY: 0 1 2 3 4 5

TOP ATTACK METHOD: SHOOTING | STABBING | INCENDIARY | KIDNAPPING/HOSTAGE TAKING | IMPROVISED EXPLOSIVE | CAR RAMMING

2024 INCIDENTS 0 | 2024 FATALITIES 0

JAPAN

TERROR INDEX: LOW | MODERATE | MEDIUM | HIGH | EXTREME

COMBATIVITY: 0 1 2 3 4 5

TOP ATTACK METHOD: SHOOTING | STABBING | INCENDIARY | KIDNAPPING/HOSTAGE TAKING | IMPROVISED EXPLOSIVE | **CAR RAMMING**

2024 INCIDENTS 0 | 2024 FATALITIES 0

CANADA

TERROR INDEX: LOW | MODERATE | MEDIUM | HIGH | EXTREME

COMBATIVITY: 0 1 2 3 4 5

TOP ATTACK METHOD: **SHOOTING** | STABBING | INCENDIARY | KIDNAPPING/HOSTAGE TAKING | IMPROVISED EXPLOSIVE | CAR RAMMING

2024 INCIDENTS 3 | 2024 FATALITIES 0

GERMANY

TERROR INDEX: LOW | MODERATE | MEDIUM | HIGH | EXTREME

COMBATIVITY: 0 1 2 3 4 5

TOP ATTACK METHOD: SHOOTING | **STABBING** | INCENDIARY | KIDNAPPING/HOSTAGE TAKING | IMPROVISED EXPLOSIVE | CAR RAMMING

2024 INCIDENTS 8 | 2024 FATALITIES 11

MALI

TERROR INDEX: LOW | MODERATE | MEDIUM | HIGH | EXTREME

COMBATIVITY: 0 1 2 3 4 5

TOP ATTACK METHOD: **SHOOTING** | STABBING | INCENDIARY | KIDNAPPING/HOSTAGE TAKING | IMPROVISED EXPLOSIVE | CAR RAMMING

2024 INCIDENTS 321 | 2024 FATALITIES 1001
