

COVID-19 TESTING SOLUTIONS

Getting back to business is your top priority, your safety and security is ours.

Companies across all industries are now faced with the same challenge: How do you ensure employees health and safety are top priority as you return to in-person office settings? Global Guardian is now providing COVID-19 HIPAA compliant testing solutions to provide clients with a quick and secure way to test all employees prior to in-person work, meetings, or conferences.

HOW IT WORKS**1**

Employers can choose to have the **COVID-19 testing be conducted in-office, in-home, or onsite at a nearby clinic.** The tests can set up to be done weekly, bi-weekly, or for one-time events such as in-person conferences or events.

**2**

Testing options include **Rapid Antigen or RT-PCR tests, done using a nasal swab.** The results can be delivered as a secure PDF report via email and SMS.

**3**

The results will also be available in a **HIPAA compliant portal** and if desired can be reviewed by one of our board certified physicians.

**4**

Privacy is important to us. If an employee tests positive, Global Guardian will work with the employee and employer on next steps.

GET STARTED**STEP 1:**
Reach Out

Global Guardian is standing by ready to support. Contact us today to start the process in ensuring your employees return to work safely.

STEP 2:
Evaluate

Global Guardian will ask you a few questions about your needs as well as make recommendations of the most appropriate solution for your situation.

STEP 3:
Implement

Once the best solution is determined for your organization, testing can often be completed in days.

ABOUT GLOBAL GUARDIAN

Global Guardian offers a full range of domestic and international duty of care services. Traveler tracking (active and passive), medical and security response, secure transport, intelligence and due diligence, emergency evacuation and custom aviation, cyber security, and video surveillance monitoring. Via our 24 hour command centers, and affiliates on the ground in over 125 countries, Global Guardian can seamlessly integrate these capabilities into a “one button push” that empowers organizations to manage their people, assets and communications.
